

## Technical sheet

# POLYWEAVE™

<b>End use</b>	A horticultural grade plastic film with a variety of applications including greenhouse roll up sides or ends, covering of doors, animal shelters, gazebos etc.			
<b>Product Description</b>	A three layer translucent fabric consisting of two outer clear layers of polythene on each face of a central woven scrim.			
<b>Warranty</b>	30 month pro-rata U.V. warranty, conditions apply			
<b>Sizes</b>	<b>Roll Width</b> 2.7m 4m	<b>Length</b> Cut to length	<b>Weight</b> 0.164kg/sqm 0.164kg/sqm	<b>Code</b> POLW2.7 POLW4
<b>Thickness</b>	300 microns +/- 10% Manufacturing Tolerance			
<b>Structural Properties</b>	A woven polyethylene fabric that is laminated to a clear U.V. stabilized film, providing a translucent yet flexible material that offers extreme wear and tear resistance.			
<b>Other Accessories</b>	Lockstrip or Duralock film fastening systems may be used to secure Polyweave to framework.			

### APPLICATION / INSTALLATION:

For a complete installation guideline please refer to the redpath film installation guidelines - these can be viewed on [www.redpath.co.nz](http://www.redpath.co.nz) web site under the heading greenhouse films.

Polyweave is commonly used for sidewall rolling walls, lean-to applications or as a high strength roof covering. Polyweave can be installed with either side facing to the outside. Polyweave should be secured to the structure with a reliable greenhouse film holding system (e.g Duralock 2). Pull the polyweave as tight as possible & avoid leaving wrinkles or folds in the film.
