# WEEDSHIELD – BLACK WOVEN

<b>End use</b>	<p>For the suppression of weeds when laid onto the ground. Approximately 90% effective when installed correctly. Some tenacious weeds or grasses will still potentially penetrate. Spray off weeds prior to installation, and apply two layers of weed matting if required. Overlap edges by 150mm, staple every 500mm. Covering matting with woodchip or rock/metal for longest UV service life.</p>			
<b>Product Description</b>	<p>A woven black polypropylene fabric that is U.V. stabilized for typical use in outside locations. Its woven structure allows air and moisture to pass through and maintain healthy soil below. When new the matting will be less porous. As the weed matting ages it becomes more hydrophilic over time as the resins self-wash and make improved contact with the ground soils.</p>			
<b>Warranty</b>	2 year pro-rata U.V. warranty, conditions apply			
<b>Sizes</b>	<b>Roll Width</b>	<b>Length</b>	<b>Colour</b>	<b>Code</b>
	1.2m	50,100,200	Black	WEE1.2/50,100,200
	1.83m	50m	Black	WEE1.83
	3.66m	50m	Black	WEE3.66
	5.25m	50m	Black	WEE5.25
<b>Grams/sqm</b>	100gsm +/-7.5%			
<b>Edge Finish</b>	Hot knife finish			
<b>Other Accessories</b>	<p>Ground galvanized staples are sold in 5" (125mm) and 9" (225mm) sizes. These can be place to suit the soil. Typical spacing is 500mm along the edge of the cloth and 1 staple per sqm within the body of the Weedmat. Use longer staples for loose soils or windy sites.</p>
